**Business, Family,  
Food & Pet Friendly**

**Safe & Effective**

## INTRODUCTION

Organix Pest Control has been providing the Oil and Gas Industry with Safe and Pest-Free workspaces since 2013. Pest intrusions create a series of issues, from operational delays to personal health and safety risks. We are dedicated to protecting businesses, people, and the environment while branding them PESTICIDE FREE-ZONES.

## COMPANY MISSION & VISION

Our mission is to eradicate pests while saving lives and our fragile environment, from the harmful toxins of pesticide poisons. We strongly believe being eco-friendly, quality, affordability, and customer service excellence should come as a standard. To make every location a PESTICIDE-FREE ZONE.

## OUR SERVICES

Organix Pest Control provides a complete range of safer and more effective pest control services to the Oil and Gas industry. We understand the nature and complex operations of the Oil and Gas industry and offer services that are uniquely tailored to the sector. The importance of protecting the health and safety of people and the environment at facilities and distribution centers cannot be understated. With years of experience working in these demanding and flammable environments, we know firsthand the danger pests pose to the Oil and Gas industry operations.

# OUR OBJECTIVE

Our objective is to eradicate and prevent pests and the significant danger they pose to day-to-day operations including employee health and safety. To completely eliminate the threat the presence of rodents pose to the Oil and Gas industry by their impulsive chewing on stock and electrical wires that cause short-circuiting and ignite flammable vapors. To Recognize and control incidents before they happen in order to prevent injuries and deaths.

## WHY ORGANIX PEST CONTROL?

Our services eradicate pests from the roots and substantiate claims of caring for the health of people and the environment. We are experienced in providing safe and effective pest control treatments to the production, distribution, refining, and retailing of petroleum. From upstream, midstream to downstream, there is no sector we don't service. Our technicians are well trained, and experienced and can be mobilized within hours locally and 72 hours internationally. We comply with all industry standards and protocols. Our services cause no disruption to day-to-day operations nor create any downtime.

There is no job too big or too small, we do it all. Our success is in our experience and the products we use that are mainly natural food sources and irresistible to pests. This allows us to wipe out any infestation from deep underground and in impossible to access areas. Once the compound bait is fed to pests they then in turn feed it to their colonies, thus wiping out the colony from deep underground. Our products are Safe, Effective, Biodegradable, and do not contaminate workspaces or the environment.

## PESTICIDE-FREE ZONES

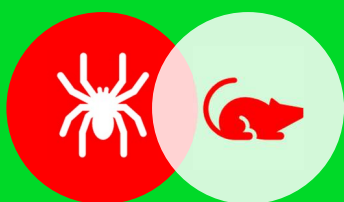

PESTICIDES-FREE ZONES define true sustainable life-saving practices and caring for life on the planet. In this day and age, and with an increasingly more health and environmentally conscious population, consumers and employees expect companies not only to engage in their health but also to be a demonstrable force of change in their communities.

Pesticide-Free Zone Branding is good for business and validates environmental, social, and health claims, setting you apart from the competition. Pesticides contaminate soil, water, turf, and other vegetation. In addition to harming overall health, pesticides can kill a host of other organisms important to life on earth, including but not limited to; birds, fish, beneficial insects essential to pollination, and non-target plants.

Organix Pest Control delivers a service that makes a difference.

# OUR GUIDING VALUES

Our core values give us a framework for leadership and influence our business decisions and how we ultimately service our customers. They are our guiding light and drive how we work and shape what we aspire to be and do. The following core values define us and are at the heart of our business.

Our Core Values Guide  
Everything We Do

---

## ■ Genuine Care

We are sincere, trustworthy, and reliable. We genuinely care about creating safe pest-free environments without using false greenwashing products that are misleading the industry.

---

## ■ Exceptional & Innovative Services

We're committed to creating safe and pest-free spaces and experiences that delight our clientele. We are highly creative and always strive to optimize our services with leading innovations and cutting-edge technologies.

---

## ■ Pesticide-Free Zones

We aim to enable everyone to be the change the planet needs by creating PESTICIDE-FREE ZONES. Be part of our Earth-saving initiative.

---

## ■ Trusted

We say what we mean and mean what we say. We stick to our commitments, treat everyone equally and communicate openly and honestly. We go above and beyond and come highly recommended with letters of recommendation and a perfect 5-Star Google rating.

## Company History & Overview

**Organix Pest Control is the premiere choice for Businesses and Homes that are serious about Safe and Result Based Pest Control.**

**Recommended by Industry leaders from the Oil and Gas sector to the fast-food industry. All our services are industry and auditing complaint with all required Documentation and Certification.**

## WHO ARE WE?

Our humble Story began in 2003 with Organic Agriculture. Today we are at the forefront of effective Organic and Natural based Alternative Pest Control Products & Services. Our Pest Control Services saves lives and the environment from harmful pesticide poisons that do more harm than the pest they try to kill. We aspire to provide everyone with the right to a pesticide free life. We are proudly Australian and have made hundreds of businesses and households Pest Free and Pesticides Free.

We cater to all industries both international and local and have a proven track record that speaks for itself.

Land, Sea, and Air. We do it all!

Our services protect against all varieties of pests from big to small, slithering, crawling and even flying pests.

We employ the latest techniques and innovative pest management solutions in prevention, control and eradication.

# BENEFITS

## Effective Treatment Methodology

---

The health & safety of our customers, their staff, and the environment is a priority to us. Our treatments are safe, fast-acting, effective, and cause no downtime. Before applying our compounds, our licensed technicians will consider the various options and choose the most effective treatment methodology for your service.

## Environmentally Safer Solutions

---

We care about the environment and do our part to protect it. By using Organix Pest Control services you are enriching your life and surroundings with a true sustainable non-Greenwashed service. Greenwashing is the process of conveying a false impression about how some products or pesticides are more environmentally sound and friendly. No such thing as a harmless pesticide!

## Keeping Businesses, & People Safe

---

Pesticides and Pests can harm any business or home and can threaten the safety of all, including operations. Not only do pesticides kill and cause long-term health issues but so do pests. They spread countless diseases and cause damage, fires, and power outages. Rodents destroy wiring, products, and equipment by chewing on wires to get to the copper in the center. This can spell disaster for businesses and homes.

## Best Practice, Better Hygiene

---

Illnesses like streptococcus, salmonella, leptospirosis, encephalitis, staphylococcus, Ross River fever, dengue fever, and even the terrible bubonic plague can all be transmitted by pests. You won't need to worry about the spread of illnesses or the health effects of pesticides with Organix Pest Controls' Services. We are dedicated to providing high-quality safe and effective pest control services.

## Less Time Spent Cleaning

---

Infestations with pests like mice, rats, and cockroaches require constant cleaning. By eliminating these pests, your premises instantly becomes cleaner and more hygienic. This then frees you up from cleaning dead insects, feces, and the mess they leave behind. Save money and time!

## Non-Toxic Earth Friendly

---

We use products that are safe and care about the health of people, pets, and our fragile ecosystems. Our baits are irresistible to pests making them fast-acting. Our services are engineered to deal with the heaviest of pest infestations while still remaining safe to use around humans and pets.

# COMPETITIVE ADVANTAGE

- Business, Family, Food, and Pet Friendly
- 100% Safe, Effective, and Guaranteed Services
- PESTICIDE-FREE ZONE Branding
- Extensive Technician Training & Experience
- No Irritating harsh after scent
- No need to evacuate premises during application
- No interruption to day to day operations
- Auditing Compliant, Licenced, Insured & COVID Vaccinated

---

## INTERESTING FACT 1

The negative effects of rodents and insects cannot be underestimated. They chew through wires to get to copper wiring which assists in their digestion. This can lead to a short circuit or loss of power. Another factor for Rodents chewing through metal is to shave off their teeth as they constantly keep growing and need trimming.

---

## INTERESTING FACT 2

Once inside, mice can squeeze through gaps 1cm high, and require a relatively small amount of food to survive – only 1g per day. When settled, they can reproduce frequently, with a gestation period of just 2 weeks, and litters of up to 16 pups. A pair of mice can produce as many as 2,000 offspring in a single year and pups will only take up to 3 weeks to mature and also start breeding.

# CLIENTS REVIEWS

ORGANIX PEST CONTROL has been receiving **5-Star** Google Ratings from a wide range of clientele.

“We unburden establishments and homes from the plague of pests and pesticide use and its harmful effects on people and the environment” -

*Karim Merabi*  
CHAIRMAN & CEO

PUMA ENERGY

The amount of effort Organix Pest Control puts into its services is very reassuring. We now don't have to worry about any rats chewing on wires and equipment. Highly recommend their service as well as being in line with our environmental, social, and governance (ESG) framework.

Chevron

They eradicate everything especially our rodent problems while using a safe and effective product that doesn't harm our staff and the environment.

Tullow Oil

Organix Pest Control was able to assist on relatively short notice for both staff residences and sites. Very enthusiastic, friendly, and keen to help. We feel like we are in good hands. They come across as very competent and trustworthy. Thank you, team Organix!

Organix Pest Control is the service provider of choice when it comes to SAFE and PEST-FREE professional pest control treatments. Trusted by a countless number of businesses and households delivering safer and more effective pest services that save lives and the environment.
